

Competent Examiner – Refresher **Part 2**

Video Instructions

You need to submit three videos

Video one should include a 10-minute segment showing how you inspected an air receiver using NDT techniques and visual Internal / external techniques, this may also include endoscope camera use.

Video two should include a 5-minute segment showing how you tested a safety valve from the system under inspection.

Video three should include a 5-minute segment showing how you tested a pressure gauge from the system under inspection.

These videos should be emailed to training@bcas.org.uk
